

Phonics Skills, pages 96-97

Ms. Canzone's class completes these pages in Teaching Example 4: Working with Long *a* and its Spellings. The words and sentences on page 96 are not meant just to be copied. The children read the words and sentences before writing them, and they sound out the words as they write. Page 97 is done as a class too. Ms. Canzone walks around to see how the children are doing. This helps her decide who needs additional help during Workshop.

Louis should have circled the "W" in *with* because it should be lowercase. As Ms. Canzone walks around the room, she notices things like this. During Workshop, she can work with Louis and other children who need additional help with writing conventions such as the use of capitals and spacing.
